

COS Essential Tools to Empower Your Researchers

COS Research Support Services

The easiest and most comprehensive way for researchers to fund, connect and publish.

COS Scholar Universe

Discover an entirely new world of collaborators, mentors, and more.

Someone you've never heard of, in a place you've never been, could hold the key to your research goals. Find them, and gain direct access to them, as well as two million additional authors, researchers, and other scholars from around the globe—including faculty at the world's 500 top universities—with COS Scholar Universe.

This editorially controlled, keyword-searchable database offers faculty, students, and researchers unparalleled opportunities to expand their professional and scholarly network and find out what's happening even in fields that intersect their own areas of expertise. Updated continually, COS Scholar Universe compiles comprehensive scholar profiles from a wide range of sources. Each profile is then carefully reviewed and verified to guarantee complete accuracy.

Students can find mentors. Researchers can identify collaborators for grants. Faculty can locate thought leaders. Administrators can search for peer reviewers. When your network is the world's scholarly community, the potential to break new ground becomes unlimited.

Global collaboration and trans-disciplinary collaboration are common grant requirements. COS Scholar Universe helps your organization's scholars connect with collaborators worldwide, and in multiple fields greatly increasing their eligibility for grants from unexpected and untapped sources.

As the world of research and scholarship becomes more trans-disciplinary, more global—more complex—the students, faculty, scholars and researchers at your organization need help to navigate through it. COS's suite of Research Support Services are designed to do just that—and do it easily, quickly, and reliably.

COS Research Support Services are essential tools for researchers at every level in your organization and all along the research path. Funding. Collaboration. Publishing. With integrated products to support these fundamental aspects of the research process, COS Research Support Services are indispensable tools for successful research.

Accessible from anywhere, COS Research Support Services are multi-disciplinary, cover the entire globe and let researchers dig deeper into their fields, tapping into vital resources they didn't know even existed. In one search, they can discover new opportunities they never realized were available to them—grants, peers, and conferences—and other facets of their communities. The right opportunities and the right people are out there to empower your organization's research. You just need to know where—and how—to look.

COS Funding Opportunities

Locate financial support with the most comprehensive, easy-to-use, and reliable source available.

Imagine—with just a few simple clicks—finding the funding to support almost any kind of work. COS Funding Opportunities breaks down borders and transforms the entire globe into an incredible funding source.

Packed with more than 25,000 records of opportunities worth an estimated \$33 billion, COS Funding Opportunities is the world's largest database of grants, fellowships, and other monies from both private and public sponsors. No matter where you call home, it's a valuable resource for every member of an institution's community—from graduate students and researchers to faculty and development offices.

You can easily define search criteria as well as scan, save, organize, share and track the results. Receive automatic email alerts whenever a new opportunity becomes available. And, with specialized features developed just for research administrators and managers, you can efficiently help other individuals and groups identify funding opportunities, and monitor their activity to make sure they're maximizing every possibility.

Above all, you can rely on COS Funding Opportunities information. The database is updated daily, each opportunity is verified with its sponsor for veracity, and then they are all indexed for accurate keyword searching. There's no simpler nor more complete way for researchers to find the funding they need.

COS Expertise

Keep track of your organization's valuable intellectual assets

Designed for research administrators, COS Expertise lets you catalog, track, and manage your organization's faculty and their research. With a specialized link to COS Funding Opportunities, you can also match faculty with funding opportunities to ensure that they're aware of all relevant funding.

Quickly pinpoint funding opportunities in a variety of disciplines:

- › Arts & humanities
- › Life & physical sciences
- › Social sciences
- › Business & technology

Find funding for a wide range of needs:

- › Research
- › Prizes
- › Fellowships
- › Equipment
- › Materials acquisition
- › Facility use
- › Travel
- › Meetings
- › Collaboration
- › Publishing
- › More

Papers Invited

Find opportunities to present your research with the world's largest call for papers.

Discover the most complete way to find venues to promote your organization's work and connect and collaborate with peers globally. Papers Invited is a comprehensive, current database of nearly 12,000 calls for papers, presentations, and posters from conferences worldwide, plus announcements about special editions of journals.

Covering the full range of disciplines, Papers Invited makes it easy to search for conferences and calls for papers that meet the user's parameters, and to receive email alerts about new opportunities. It's a resource that benefits the entire organization by helping faculty, students, and researchers find opportunities to present and publish their works. Sources covered include niche organizations and conferences around the world.

Publishing is absolutely critical to establish credibility and build tenure. Papers Invited will support you in helping your organization's scholars reach those goals and more.

Conference Papers Index

Keep learning from conferences past

After the conferences and meetings are over, Conference Papers Index (CPI) stores the wealth of information presented so that researchers can easily draw from it in the future. With nearly two million papers, posters and presentations, the database is updated bi-monthly, compiled from final programs, abstract booklets, published proceedings and questionnaire responses to provide a valuable, easily searched resource for scholars.

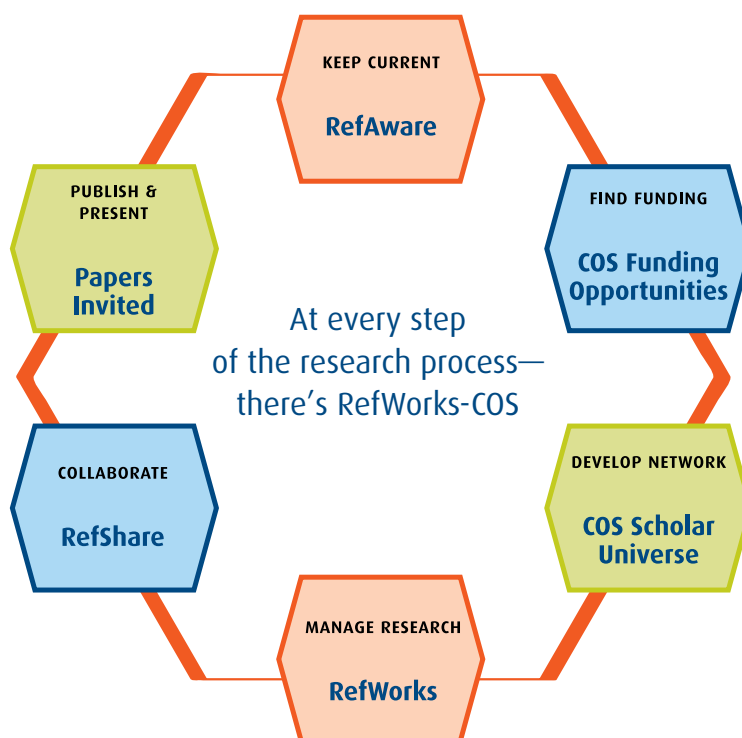

Comprehensive. Valuable. Indispensable.

Essential tools to empower your researchers

Encourage collaboration and innovation in your organization with COS Research Support Services. To learn more, visit www.refworks-cos.com or email sales@refworks-cos.com.

RefWorks-COS—indispensable tools for research at its best.

RefWorks-COS provides tools, data and support for every phase of research, from vetting the first hypothesis to obtaining funding and getting published. All our products are designed to help researchers, faculty and students work at their best and achieve their research goals.
