

RefWorks-COS provides tools, data and support for every phase of research, from vetting the first hypothesis to obtaining funding and getting published. All our products are designed to help researchers, faculty and students work at their best and achieve their research goals.

“COS Funding Opportunities is an invaluable tool for our faculty and researchers. As the liaison, I am very impressed by the amazing customer service and the online interactive training opportunities. The Client Services team is always available to lend support, and they even provide free materials to help me promote the service on campus.”

—Brandy Foster  
Wright State University

“When I show RefWorks to groups of students, I get gasps and applause! And its no surprise that your customer reps are great, too.”

—Steve Teich  
Oregon Health & Science University

## Vital tools for every member of the research community

Relied upon by top research organizations around the world, RefWorks-COS tools benefit virtually everyone involved in the research process, including faculty, researchers, administrators, students, and information professionals in all types of organizations.

In academia, corporations, government agencies and medical organizations, RefWorks-COS supports research professionals at every step—all around the globe.

- Information professionals, scholars and researchers depend on our tools to manage, organize and streamline their research, stay abreast of the latest information, locate collaborators and even find funding and publishing opportunities.
- Research Managers who support institutional research departments use our tools to manage faculty and researcher profiles as well as find grants and other opportunities for their departments.
- Publishers and platform providers use many RefWorks-COS services to enhance the value of their collections and publications.

Research today is more interdisciplinary, global, competitive and complex than ever, which is why the world's leading research organizations and professionals depend on research support tools from RefWorks-COS.

# At every step of the research process—there's RefWorks-COS

**RefAware** gives researchers and information specialists access to the latest published articles and research within hours of online postings. RefAware constantly monitors more than 9,000 peer-reviewed and non-refereed sources for the latest updates, automatically delivering relevant postings to the user based on criteria they select.

**Papers Invited** provides access to nearly 12,000 calls for papers from conferences worldwide. Invaluable for researchers and academics looking for presentation and publication opportunities, it also contains many opportunities for undergraduates. Afterwards, citations to papers and poster sessions are collected into **Conference Papers Index**.

**COS Funding Opportunities** links your institution to \$33 billion in grants, fellowships, prizes and more from public- and private-sector sponsors around the world. This multidisciplinary, global database of over 25,500 records contains funding opportunities for collaboration, travel, equipment and much more.

RefWorks  COS

**COS Expertise** enables organizations to easily manage, catalog and track professional profiles of their faculty and researchers. The database contains nearly a half-million profiles submitted by researchers, scholars and other experts from research institutions worldwide.

**RefWorks** is the solution of choice at more than 1,000 elite research organizations around the world. Over 1 million users depend on RefWorks to easily gather, digest, organize and share research information daily. Web-based and workflow-based, RefWorks keeps information organized and at the researcher's fingertips.

**COS Scholar Universe** is your online connection to potential collaborators, peer-reviewers, mentors, consultants and experts in more than 200 disciplines. It provides online access to the global community of experts in virtually any field of interest, with keyword-searchable profiles of over 2.1 million scholars and researchers worldwide.
